Description

Gain experience with real-time website data. Collect, organize, and summarize reviews to understand customer sentiment. Develop skills in data handling and analysis.

Requirements

Choose any restaurant. Read through recent customer reviews, Paying attention to overall customer sentiment (Positive, Negative, or Neutral)

Organize data in a spreadsheet with ratings and key points (min 20-30)

Analyze data to find average rating and frequent positive/negative reviews. (eg "Delicious Food" "Slow Service," etc)

Present findings i a concise report highlighting key aspects. Include the average rating, along with a few key points about the most common positive and negative aspects mentioned in review.

Make it accessible on your GitHub repository.
